

Call Tracking

Don't just track the call, see the user.

Foureyes patented call tracking allows you to see what the callers from your website are doing on your website. Leverage this data to understand your customers, respond to their shopping and close more deals.

BENEFITS

1

Listen to your customers

Understand your leads' real desires by seeing what they may not be telling you.

2

Don't drop deals

Understanding your customers and seeing what they are doing on your website allows you to close more deals.

3

Spend smarter

Know which channels are (or aren't) sending you quality leads so you can be smarter with your marketing dollars.

FEATURES INCLUDE

SOURCE YOUR CALLS

See what channels are truly generating sales calls.

VISITOR DETAIL

See the shopping activity of your phone call.

PLAYBACK & RECORDING

Don't lose deals. Listen to calls for coaching, logging, and sales tracking.

CALL TRACKING

HOW IT WORKS

Tracks all website (and phone) activity

Foureyes records what your leads do on your website—every search, filter, form, chat, and page view. It can track phone calls too!

Links web-to-call information

Our patented, dynamic call tracking ties your phone leads to their website activity. When a lead calls your business, you'll learn everything they've been looking at online.

Collects leads into a single view

View all form, chat, and phone leads and their associated website activity history in a simple user-interface.

Connects to your CRM

If you've integrated your CRM with Foureyes, it looks in your CRM to give you the status of that record in the CRM.

THE POWER OF
FOUREYES

28k

leads are **measured, analyzed,**
and **closed daily** with Foureyes

Getting started is easy
